

Indoor LoRa Gateway

The Indoor LoRa (LoRaWAN) Gateway connects to the React Mobile LoRa Panic Button to provide an all in one solution capable of protecting employees without the need for a tethered smart device.

The Indoor LoRa Gateway serves as an access point that enables connectivity between LoRa wireless IoT devices and the network or cloud infrastructure. The gateway offers various wide-area-network communication options, including wired and wireless interfaces, allowing flexibility in connectivity.

KEY FEATURES
